PROJECTS

Learning Management System | *Database Developer* | *React, TypeScript, FastAPI, SQL Server* Sep 2025 – Dec 2025

- Designed database schema using EERD and performed relational mapping for course, user, and enrollment data
- Collaborated with team members to integrate backend services and database operations via RESTful APIs
- Supported frontend integration and system documentation during development

Credit Sentinel | *Full-stack Developer* | *React, TypeScript, FastAPI, PostgreSQL, Docker* Mar 2026 – May 2026

- Developed a fraud detection dashboard with React frontend and FastAPI backend
- Implemented JWT authentication, role-based access control, PostgreSQL storage, and RESTful APIs
- Integrated machine learning models and SHAP-based explainable AI for transaction analysis
- Dockerized and deployed the application for local hosting and development workflows

Google Forms Auto-Filler | *Full-stack Developer* | *Python, FastAPI, Selenium, PostgreSQL, Docker* Tet 2026

- Developed an automation tool to automatically fill and submit Google Forms
- Built both terminal-based and web-based interfaces using FastAPI
- Implemented JWT authentication, user quota management, and session handling
- Integrated Selenium-based browser automation with configurable answer generation
- Self-hosted the application on a home server using Cloudflare Tunnel at ggform.xofai.online
- Provided portable executable builds for easier local usage without installation

Personal Web Portfolio | *Frontend Developer* | *React, TypeScript, Tailwind CSS, Cloudflare Pages* Summer 2025

- Designed and developed a personal portfolio website to showcase projects, skills, and academic background
- Built responsive and interactive UI using React, TypeScript, and Tailwind CSS
- Deployed and maintained the portfolio website at xofai.online
